Dear Mr. Gunderson:

The purpose of this letter is to deliver the Final Pre-Demolition Survey Report (PDSR) for Building 778 for your concurrence. This submittal is in accordance with the Rocky Flats Cleanup Agreement and is the result of the consultative process to establish and document the final survey status of this type two structure.

This PDSR identifies the portions of the building that meet the unrestricted release criteria of the Rocky Flats Environmental Technology Site Pre-Demolition Survey Plan, MAN-127-PDSP and also identifies the specific locations that failed to meet the radiological unrestricted release criteria. Appropriate controls for those contaminated locations will be implemented to prevent cross contamination of clean building debris during demolition. The contaminated locations will be remediated and the waste will be handled as low-level radioactive material after the removal of the portions of the building that meet the release criteria.

Please feel free to direct any questions to Gary Schuetz at (303) 966-3016, or you may contact me at (303) 966-2282.

Sincerely,

Sir George Meyer
